

Research at Azam Research Center

H. G. M. Azam College of Education Research Centre

Research Activities at Azam Research Center (Centre of Excellence)

H. G. M. Azam College of Education Research Centre functions as a dynamic research hub within the Institution, with a strong commitment to advancing knowledge, innovation, and evidence-based practices in the field of education. The Centre plays a vital role in promoting a research culture among faculty members, research scholars, and student teachers, thereby contributing meaningfully to academic excellence and societal development.

Vision and Objectives of Research at ACE

The primary vision of research at ACE is to foster high-quality, interdisciplinary, and practice-oriented research that addresses contemporary educational challenges.

The Centre aims to:

- Promote a culture of inquiry and innovation in teacher education
- Encourage faculty and students to undertake original and impactful research
- Bridge the gap between educational theory and classroom practice
- Support policy-relevant research in education
- Contribute to national and global educational development through research dissemination

Thrust Areas of Research

Research activities at ACE are organized around key thrust areas relevant to teacher education and educational development, including:

- Pedagogy and innovative teaching–learning strategies
- Curriculum design and educational assessment
- Educational psychology and learner development
- Inclusive education and special needs education
- Educational technology and digital learning
- Teacher professional development
- Educational leadership, management, and policy studies
- Community engagement and social justice in education
- Interdisciplinary and multidisciplinary approach

These focus areas ensure that research conducted at ACE remains relevant, contextual, and responsive to evolving educational needs.

Faculty Research and Publications

Faculty members associated with the (ACE) is known for academic centre of excellence, play a pivotal role in strengthening the research culture of the Education College through their active engagement in systematic, innovative, and scholarly research activities. The Centre provides a conducive academic environment that encourages faculty members to pursue research aligned with contemporary educational issues, institutional priorities, and national educational goals.

Faculty Engagement in Research Activities

Faculty members are actively involved in both individual and collaborative research activities which focusing on diverse areas of education such as pedagogy, curriculum studies, educational psychology, inclusive education, educational technology, assessment and evaluation, teacher professional development, and

educational management. Emphasis is placed on practice-based and field-oriented research, enabling faculty members to address real classroom challenges and contribute to the improvement of teaching–learning processes.

Our research Centre encourages faculty to undertake action research, empirical studies, survey research, and interdisciplinary research that integrates theory with practice. Faculty members also guide student teachers and research scholars in conducting research activities, undertaking dissertations, presenting research papers thereby fostering a strong mentor–mentee research culture.

Publications in Peer-Reviewed Journals

Faculty members regularly publish research articles in peer-reviewed national and international journals indexed in recognized databases. These publications reflect original research, critical analyses, and innovative perspectives on educational practices and policies. The Centre emphasizes quality research outputs, adherence to ethical research standards, and avoidance of plagiarism through the use of standard plagiarism detection tools.

Institutional support is extended for publication through academic mentoring, internal peer review mechanisms wherever applicable. Faculty members are motivated to publish in reputed journals to enhance the visibility and academic standing of the institution.

Contributions to Books and Edited Volumes

In addition to journal publications, faculty members contribute chapters to edited books, reference volumes, and academic publications related to education and allied disciplines. These contributions showcase faculty expertise and thought

leadership in specialized areas of education. Faculty members are also encouraged to serve as editors or co-editors for academic books and conference proceedings, further strengthening their scholarly profiles.

Conference Presentations and Academic Participation

Faculty members actively participate in national and international conferences, seminars, workshops, and symposiums by presenting research papers and posters. Every year college organizes International and National Conference/ Seminar on innovative topics in Education and provides platform for the faculty members as well as students.. These academic platforms provide opportunities for faculty to disseminate research findings, receive scholarly feedback, and engage in academic networking. Participation in such events helps faculty remain updated on emerging trends, innovative methodologies, and global best practices in education.

The institution supports faculty participation in conferences by granting academic leave subject to institutional policies.

Institutional Support and Research Promotion

Azam Research Centre plays a proactive role in promoting faculty research through structured institutional support mechanisms. These include:

- Research mentoring and guidance by senior faculty
- Formation of research guides and research scholars' groups
- Conducting offline and online research lectures
- Organization of research methodology workshops and writing clinics
- Recognition for quality research publications
- Support for collaborative research with external institutions

Regular research review meetings are conducted to monitor progress, provide feedback, and ensure alignment with institutional research goals.

Collaborative and Interdisciplinary Research

Faculty members are encouraged to engage in collaborative research with other higher education institutions, universities, schools, research organizations, and professional bodies. Such collaborations enhance research quality, broaden perspectives, and lead to joint publications.. Interdisciplinary research initiatives are particularly promoted to address complex educational and social issues holistically.

Impact of Faculty Research

The research and publication activities of faculty members significantly contribute to academic enrichment, professional development, and institutional reputation. Research findings are often integrated into curriculum design, teaching strategies, and extension activities, thereby ensuring that research outcomes have a direct impact on educational practice and community development.

Research by Students and Scholars

College provides structured guidance and mentorship to student teachers and research scholars for undertaking action research, preparing dissertations, and research related studies. Students are trained in research methodology, data analysis, academic writing, and ethical research practices. This hands-on exposure strengthens their analytical skills and prepares them for future academic and professional roles.

Seminars, Workshops, and Conferences

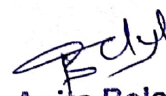

H. G. M. Azam College of Education regularly organizes research-oriented academic events such as research lectures, seminars, workshops, panel discussions, and conferences. These programs focus on research methodology, emerging trends in education, academic writing, and publication ethics. Such events provide platforms for knowledge sharing, networking, and professional development.

Research Ethics and Quality Assurance

Azam Research Center emphasizes ethical research practices and academic integrity. Proper guidelines are followed for data collection, consent, confidentiality, and plagiarism prevention. The Centre ensures quality through peer review, mentoring, and continuous evaluation of research outputs.

Impact and Future Directions

Research conducted at Azam Research Center contributes to improving teaching practices, informing educational policy, and enhancing institutional quality. The Centre aims to expand its research footprint by increasing interdisciplinary studies, international collaborations, funded projects, and high-impact publications in the future.
